

# DROP TABLES

FULL TRUCK DROP TABLE

- PROVIDES QUICK AND EFFICIENT INSPECTION AND REPAIR OF FULL TRUCK LOCOMOTIVES
- ADAPTABLE TO SATISFY ALMOST ANY SERVICE REQUIREMENT OR SIZE PIT
- FEATURES REMOTE OPERATION ELIMINATING A POTENTIAL TRIPPING HAZARD FROM A TETHERED CONTROL UNIT
- OPTIMIZES SAFETY WITH SELF-LOCKING BUTTRESS SCREWS THAT REMAIN STATIONARY IN THE EVENT OF A DRIVE MALFUNCTION
- SUPPLIED WITH A UNIQUE SECTIONAL TOP WHICH CAN BE USED WHEN ONLY A SINGLE AXLE WHEEL SET IS TO BE REPLACED

# BECAUSE SAFETY AND RELIABILITY MATTER...

In collaboration with major railroads, Whiting Corporation has designed and developed drop tables that can be found in most major heavy locomotive repair shops throughout the country.

Whiting understands the demands of modern railcar maintenance shops. Built to the highest quality standards, drop tables continue to run in the harshest conditions. With flexible design options and an experienced engineering team, Whiting designs each drop table to meet the unique application requirements of your facility with a focus on safety, long-term reliability, and ease of maintenance.

## THE PROCESS

Whiting Corporation has been instrumental in developing many of the value features found on drop tables today. To remove a traction motor combo or two and three axle trucks with a drop table, the locomotive is located and supported by movable body supports over the table top. The trucks are disconnected, lowered, transferred laterally and raised to a release track. The trucks can then be moved to a maintenance area where inspection and repair can be performed quickly and efficiently.

Drop tables designs are available in capacities to transfer practically any locomotive truck mechanism from a service track to a release track ... quickly and easily. Installations now serve pits from 4 feet to 26 feet in width and capacities range from 20 to 250 tons. Various types of release track covers are available including covers that raise automatically as the drop table is raised or fixed covers that can be removed by overhead cranes.

## THE RESULTS

Whiting drop tables in conjunction with our body supports and world-class service help improve safety and reliability while lowering the total cost of ownership of your investment.
