

Whiting

EV BUILT-UP TROLLEYS

- **ROBUST DESIGN WITH HIGH PERFORMANCE STANDARD FEATURES OFFERS EXCEPTIONAL VALUE**
- **STRAIGHT FORWARD DESIGN OFFERS EASE OF MAINTENANCE AND LOW OPERATIONAL COST**
- **TIME-TESTED SOLUTION PROVIDES MAXIMUM RELIABILITY**
- **RUGGED CONSTRUCTION SUPPORTS CHALLENGING OPERATIONAL ENVIRONMENTS**
- **THREE-POINT SUSPENSION HOIST MACHINERY CREATES A LIGHTER TROLLEY MINIMIZING OVERALL FOOTPRINT**

BECAUSE SAFETY AND RELIABILITY MATTER...

Whiting knows that you can't take unnecessary risks when it comes to employee safety. As such, EV trolleys have been designed for today's production and process shops. Built to the highest quality standards, they maintain operational parameters in the harshest conditions. Our design is based on a focus for safety, long-term reliability and ease of maintenance.

THE OFFERING

In its long history of working with customers to develop and implement best-in-class handling solutions, Whiting Corporation has developed many of the standard features found in the EV trolleys. Gear boxes designed specifically for hoisting applications, low cost maintenance and robust wheel assemblies, and machined trolley frames for optimum load distribution create a quality solution at an affordable budget.

EV trolleys are available in a variety of capacity, speed, and lift options ranging from 15 to 30 tons, 9 to 38 feet per minute, and 20 to 72 feet of true vertical lift. Reference the chart below to determine the configuration that works best for your application.

CLASS D EV STANDARD TROLLEY HOIST CONFIGURATION

		CAPACITY [2000 lbs. TONS]				
		15	20	25	30	
HOIST SPEED [FT / MIN]	15	14	11	9		
	20	18	14	12		
	25	22	17	14		
	29	28	23	19		
	38	36	29	24		
HOIST LIFT [FT]	31.3				6	GAUGE [FT]
	41	33.2	26.5	20.5	7	
	51.8	41.3	33	25.9	8	
	62.6	48.8	38.8	30.8	9	
	72.3	56.7	45.3	36.2	10	
		63.9	51.2	41.8	11	
		72.1	57.7	46.4	12	

THE RESULTS

For decades, Whiting has been a trusted name for overhead lifting equipment. Our quality designs and craftsmanship is reflected in all of our products. This allows us to offer the high performing EV trolley so you are able to have the safety and reliability you need, while lowering your capital and operational expenses.
